## WEBSITE DESIGN, DEVELOPMENT & MAINTENANCE

Specializing in WordPress & Woocommerce

Custom websites are Jonas Marketing's specialty. We are experienced in using content management systems, particularly WordPress, to create dynamic websites for small businesses, non-profit organizations, and healthcare professionals like doctors, dentists, orthodontists, mental health professionals, and physical therapists.

We focus on responsive website design to ensure that your site looks fantastic across all screen sizes and device types. Most of our sites leverage a premium Wordpress theme to serve as the foundational code and are highly customizable to achieve the exact look and functionality that you seek.

We guide you through every step of the website creation process, from the selection of the right domain name and hosting plan, to the design, development, and launch of your new website.

Our design clients enjoy 60 days of free comprehensive website maintenance beginning on the launch date and we train you to update your website independently. Jonas Marketing remains available for 'on demand' website support for our design clients and can often improve or update existing websites that we inherit.

With Jonas Marketing as your website designer, every byte of that website belongs to your organization, from the files and royalty free graphics to the access codes and domain name. Unlike a lot of webmasters and developers, Jonas Marketing will never hoard codes, deny access to your files, or claim your website as our proprietary work. If we design your website, it's yours and you own it.

## PREMIUM HOSTING FROM JONAS MARKETING

Reliable Linux Hosting for Wordpress Sites

### SSL CERTIFICATE & AUTO-BACKUP

Our private servers are backed up weekly to provide peace of mind and are located right here in Virginia at Pixel Factory Data Center and Amazon Web Services.

### IDEAL FOR WORDPRESS WEBSITES

With far fewer sites per box than the national remote hosting companies, load times are lightning fast.

### EXPERIENCED LOCAL SUPPORT

Jonas Marketing and Torx Media are locally owned, Richmond-based, companies that provide direct support for each hosting client.

### GREAT VALUE AT JUST \$25/MONTH

Billed annually at \$300, our premium Linux hosting plans with cPanel are configured specifically for secure, high-performing Wordpress websites and bundle an SSL certificate.

### HACK SUPPORT + WORDFENCE SECURITY

We install the WordFence security plugin for WordPress site hardening along with our Weekly Auto-Backup with 'Hack Support' for swift restorations when needed.

### FREE INCOMING SITE MIGRATIONS

For clients that opt for Jonas Marketing's premium website hosting, we migrate your new or existing site to our secure Linux servers at no extra cost.
