Experience

GKN Aerospace, Amityville, NY

May 2015 - Present

Facilities Maintenance Mechanic,

At GKN Aerospace, I've been working as a Facilities Maintenance Technician, focusing on troubleshooting and maintaining industrial machinery. My expertise includes HVAC systems, electrical work, plumbing, and general facility repairs, all geared towards ensuring smooth operations and safety.

- Skilled in using a variety of tools and techniques to troubleshoot electrical and mechanical issues, ensuring accurate and effective diagnosis.
- Consistently prioritize safety when performing machine and facility maintenance tasks, ensuring that all work is completed in accordance with established safety protocols and procedures.
- Skilled in troubleshooting and repairing a wide range of cooling systems, including chillers, cooling towers, and HVAC systems.
- Knowledgeable in repairing and maintaining various types of machinery, including conveyor systems, pumps, and motors, to ensure optimal performance and prevent downtime.
- Troubleshoot and repair issues with pump control systems, including wiring tasks.
- Ensure the reliability and functionality of process pump systems through maintenance and repairs.
- Threading pipe, sweating and brazing.
- Monitor and adjust coolant and cutting fluid levels to ensure proper concentrations and pH balance.
- Perform maintenance and repairs on central air compressor systems to ensure reliable and efficient operation.
- Perform regular maintenance and repairs on central vacuum systems to ensure optimal performance and uptime.
- Maintaining records of work orders, maintenance activities, and inventory of supplies and equipment.

NOCS, North Charleston, SC

September 2010 – May 2015

Production Assistant,

While at NOCS, I ensured clean and organized workspaces, efficiently coordinated orders, mastered shrink-wrapping for pristine deliveries, and expertly handled loading and unloading operations, complemented by my forklift certification.

- Ensure and maintain clean, organized working conditions.
- Coordinate and assemble orders safely and efficiently.
- Shrink-wrap packages to ensure they arrive in pristine condition.
- Effectively execute loading and unloading operations for containers.
- Hold certification in forklift operation

DAK Americas, SC
Machine Operator,

November 2007 – September 2010

- Operated textile machines to meet production goals and quality standards.
- Monitored machine operations, making adjustments to ensure smooth production flow.
- Conducted regular inspections and maintenance to keep machinery in optimal condition.
- Followed safety protocols and procedures to maintain a safe working environment.
- Collaborated with team and maintenance members to troubleshoot issues and minimize downtime.
- Recorded production data and maintained accurate records of machine operations.

Certifications

- Electrical Safety Program / Shock Hazard Training
- Refrigeration / Air Conditioning I
- Forklift Certified
